

Oral Fluid Drug Testing is the Answer

QUANTISAL™ ORAL FLUID COLLECTION DEVICE

FDA Cleared with 3 TIMES the Positive Hit Rate Compared to Urine

First lab based oral fluid test to offer Fentanyl.

Maximize Productivity

- Hire employees faster
- Save 2 to 3 days with instant collection and quick lab turnaround
- Keep employees on the job, minimize loss work time
- Avoid scheduling inconveniences and fees for urine collection

Oral Fluid Convenience

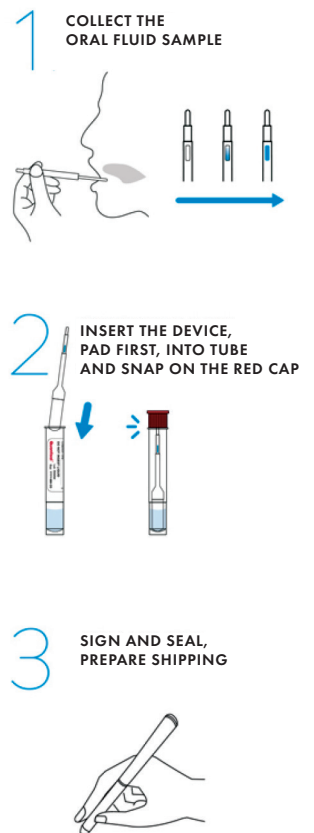

- Speeds up and controls collection process
- Preserves dignity with noninvasive self-collection process
- Immediate collection for Post-Accident, Random, For Cause
- Volume adequacy indicator ensures enough specimen is collected
- 1 mL ± 10% oral fluid collected

Eliminate Tampering

- Direct observation prevents sample tampering
- Eliminate risk of adulteration

Laboratory Accuracy

- Confidential lab based results processed at a SAMHSA and CLIA certified laboratory
- 24 Hour reporting on negative results; 72-hour on confirmed positives
- Accurate and legally defensible
- Specimen validity testing on every oral fluid specimen giving assurance that the specimen is appropriate for testing

Laboratory Confidence • Oral Fluid Convenience

Collect anytime, anywhere

Reduce adulteration and increase positivity rates with oral fluid

Advantages of Quantisal™

- **Sample adequacy window.** The patented collection device with built-in sample adequacy indicator window shows the collector that a sufficient quantity of oral fluid has been provided. This also decreases the likelihood of the sample being rejected as “quantity not sufficient” and thereby reducing the time and expense associated with a second collection.
- **Easy collection and fast turnaround.** Specimen collection with the Quantisal™ collector typically takes about 5-10 minutes. Testing is performed the day it arrives at our laboratory, with negative screening results reported within a day. Positive results are confirmed, reviewed, and typically reported within 72 hours of receipt
- **Reliable for detecting recent drug use, especially marijuana.** Quantisal™ tests for a wide range of illicit and prescription drugs including:
 - THC
 - Opiates
 - PCP
 - Cocaine
 - Amphetamines
 - Methamphetamines
 - Barbiturates
 - Benzodiazepines
 - Methadone
 - Hydrocodone
 - Hydromorphone
 - Oxycodone
 - Oxymorphone
 - MDMA/Ecstasy
 - Buprenorphine
 - Cotinine
 - EtG
 - K2
 - Bath Salts
 - Fentanyl
 - Alcohol (ETOH)

We also offer a comprehensive line on Instant Oral Fluid and Instant Urine Drug Testing Products.
